# CICS TS for VSE/ESA

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

### CICS TS Basic Structure

- CICS Transaction Server for VSE/ESA 1.1
  - Restructured CICS product
    - New domain structure
  - Based on CICS for MVS/ESA 4.1 + function from CICS TS for OS/390
    - Code base ported from OS/390
    - Uses OS/390 "family" API
  - More 31-bit storage exploitation
  - More protection from storage overlay

**Illustro**  
See The Light.<sup>TM</sup>

---

---

---

### CICS TS Basic Structure...

- Restructure of CICS into domains
  - More 31-bit exploitation
  - Standardized interfaces
  - Improved CICS code quality
  - Better serviceability and problem determination
  - Enhances CICS use of extended architecture
  - Object code only (OCO) modules

# CICS TS for VSE/ESA

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

### CICS TS Basic Structure...

- CICS TS Partition Storage Organization
  - ❑ Most of CICS nucleus above 16 MB line
  - ❑ All major CICS control blocks above 16 MB line
  - ❑ 8 Dynamic Storage Areas (DSA)
    - 4 DSAs above 16 MB line in extended (31-bit) DSA (EDSA)
    - 4 DSAs below 16 MB line in 24-bit DSA

**Illustro**  
See The Light.<sup>TM</sup>

### CICS Storage Organization

The diagram illustrates the storage organization within a CICS Transaction Server Partition. It shows a vertical stack of memory starting from 'Partition start' at the bottom and ending at 'Partition end (2 GB max)' at the top. The stack is divided into several sections:

- VSAM buffers & 31-bit control blocks (CICS 31-bit storage):** CICS Non-nucleus modules and control blocks (2.3MB). This includes EUDSA, ERDSA, ESDSA, ECDSA, and available 31-bit GETVIS.
- available 24-bit GETVIS (ICCF and Interactive Partitions):** 24-bit VSAM control blocks, etc.
- CICS 24-bit storage:** CICS Non-nucleus modules and control blocks (.5MB). This includes CICS DSA (DSA), UDSA, RDSA, SDSA, CDSA, and CICS TS DFHSIP (4K).
- 16 MB:** A large section between the 31-bit and 24-bit areas.
- 24-bit GETVIS:** Located below the 16 MB section.
- CICS TS Partition:** The bottom-most section.
- SIZE=DFHSIP:** A label indicating the size of the CICS TS Partition.

---

---

---

---

---

---

### CICS Storage Organization...

- Dynamic Storage Areas
  - ❑ CDSA and ECDSA (CICS DSA)
    - CICS-key storage
    - Non-reentrant programs
    - Control blocks
    - Task-lifetime storage
  - ❑ UDSA and EUDSA (User DSA)
    - User-key storage
    - Task-lifetime storage
    - ❑ TCA, TWA, EIB, EIS, etc.

**Illustro**

WAVV2004-9

---

---

---

---

---

---

---

---

### CICS Storage Organization...

- Dynamic Storage Areas...
  - SDSA and ESDSA (Shared DSA)
    - User-key storage
    - Non-reentrant programs
    - EXEC CICS GETMAIN....SHARED storage
  - RDSA and ERDSA (Read-only DSA)
    - Key-0 storage
    - All SVA-eligible programs not in SVA

**illustro**  
See The Light.<sup>TM</sup>

Copyright © 2004 illustro Systems International, LLC

WAVV2004-10

---

---

---

---

---

---

---

### CICS Storage Organization...

- Dynamic Storage Areas...
  - Initial allocation from system initialization parameters (cold start)
    - EDSALIM, DSALIM
    - ECDSASZE, ERDSASZE, ESDSASZE, EUDSASZE
    - CDSASZE, RDSASZE, SDSASZE, UDSASZE
  - From local catalog on non-cold start, overridden by system initialization options

**illustro**  
See The Light.

Copyright © 2004 illustro Systems International, LLC

WAVV2004-11

---

---

---

---

---

---

---

### CICS Storage Organization...

- Dynamic Storage Areas...
  - SIT EDSALIM
    - Maximum size of CICS 31-bit DSAs
    - Define in 1M multiples
    - Minimum size 10MB, default 20MB
  - SIT DSALIM
    - Maximum size of CICS 24-bit DSAs
    - Define in 256K multiples
    - Minimum size 2MB, default 5MB

**illustro**  
See The Light.

Copyright © 2004 illustro Systems International, LLC

WAVV2004-12

---

---

---

---

---

---

---

### CICS Storage Organization...

- Dynamic Storage Areas...
  - No SIT options, startup overrides only
    - ECDSASZE, ERDSASZE, ESDSASZE, EUDSASZE
      - Defines size of DSAs in 31-bit GETVIS
    - CDSASZE, RDSASZE, SDSASZE, UDSASZE
      - Defines size of DSAs in 24-bit GETVIS
    - Use default size 0
      - CICS acquires DSA storage dynamically
      - Additional increments defined as extents
    - DSAs managed using 4K page size

**Illustro**  
See The Light.<sup>TM</sup>

Copyright © 2004 illustro Systems International, LLC

WAVV2004-13

---

---

---

---

---

---

---

### CICS Storage Organization...

- Storage Protection
  - Protects CICS code and control blocks from accidental overwrite
    - CICS-Key = partition key
    - User-Key = key 9
  - Initialization parameter STGPROT=YES|NO
    - CICS TS cannot run in F4 if STGPROT=YES due to key conflict
    - F4 default is CICS/VSE 2.3 coexistence partition

**Illustro**  
See The Light.

---

---

---

---

---

---

---

### CICS Storage Organization...

#### Storage Protection

The diagram illustrates the storage protection mechanism. It shows two main key storage areas: 'CICS key storage' (yellow) and 'User key storage' (cyan). Within 'CICS key storage', there is a box labeled 'CICS programs and control blocks'. Within 'User key storage', there is a box labeled 'User application programs and control blocks'. Below these storage areas are two application areas: 'User applications' (User key storage) and 'CICS' (Execution (PSW) key = CICS key). Arrows indicate the access rights: 'Read/Write' from 'CICS' to both storage areas, 'Read/Write' from both storage areas to 'User applications', and 'Read/Only' from 'User applications' back to 'User key storage'.

# CICS TS for VSE/ESA

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

### CICS Storage Organization...

- Storage Protection...
  - ❑ Requires ESA/390 Subsystem Storage Protection facility
    - IBM Multiprise 2000 and 3000
    - IBM Parallel Enterprise Servers G3, G4, G5, G6
    - IBM 9672 Parallel Enterprise Server
    - Integrated Server 3006
    - P/390 systems
    - Some ES/9021, ES/9121, and ES/9221 models

**illustro**  
See The Light.<sup>TM</sup>

Copyright © 2004 illustro Systems International, LLC

WAVV2004-16

---

---

---

---

---

---

---

---

### CICS Storage Organization...

- Read-Only Protection
  - ❑ Read-only access to SVA-eligible phases not in SVA
  - ❑ Initialization parameter RENTPGM=(PROTECT|NOPROTECT)
    - PROTECT - RDSA and ERDSA key zero storage
    - NOPROTECT - RDSA and ERDSA CICS-key storage
  - ❑ Does not depend on Subsystem Storage Protection facility

**illustro**  
See The Light.

WAVV2004-17

---

---

---

---

---

---

---

---

### 31-Bit Exploitation

#### VSE Components

- VSE/VSAM support with CICS
  - ❑ Index and data buffers
    - Allocated in 31-bit partition GETVIS if available
  - ❑ Local Shared Resource (LSR) pool buffers
    - Index and data buffers are managed separately if defined with CICS TS CEDA DEFINE LSRPOOL
  - ❑ Non-Shared Resource (NSR) file buffers
    - FCT or RDO BUFNI and BUFND values
  - ❑ Increase buffers to reduce I/O

**illustro**  
See The Light.

# CICS TS for VSE/ESA

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

**31-Bit Exploitation**  
**VSE Components...**

- VSE/VSAM support with CICS...
  - CICS system datasets
    - VSAM buffers allocated in 31-bit storage
    - CICS Catalog Datasets DFHGCD and DFHLCD
      - Specify buffering parameters on DLBL
    - CICS Restart Dataset DFHRSD
      - Specify buffering parameters on DLBL
    - CICS Temporary Storage and Transient Data files
      - SIT TS=(buffers, strings)
      - SIT TD=(buffers, strings)

---

---

---

**31-Bit Exploitation**  
**VSE Components...**

- VSE/VSAM support with CICS...
  - DL/I database VSAM buffer usage
    - HIDAM KSDS, HDAM and HIDAM secondary index, HISAM KSDS, SHISAM KSDS (index buffers)
    - HISAM ESDS and SHISAM KSDS (data buffers)
    - Allocated in 24-bit partition GETVIS (default)
    - Change DLZACT to allocate buffers in 31-bit partition GETVIS
      - DLZACT TYPE=CONFIG HSMODE=ANY

**Illustro**  
See The Light.

---

---

---

---

---

---

**31-Bit Exploitation**  
**VSE Components...**

- LE/VSE Options
  - Runtime options
    - ALL31(OFF), STACK(BELOW) for 24-bit applications
    - ALL31(ON), STACK(ANY) for full 31-bit support
      - Program must be linkedit AMODE(31)
    - Use CEEUOPT for programs that are AMODE(24)
  - Compile options
    - DATA(24) for working storage in 24-bit storage
    - DATA(31) for working storage in 31-bit storage

# CICS TS for VSE/ESA

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

### 31-Bit Exploitation VSE Components...

- Shared Virtual Area (SVA)
  - ❑ Most CICS TS modules and programs are RMODE(ANY)
  - ❑ SIT SVA option controls use of SVA for modules
    - SIT SVA=YES uses CICS TS modules in SVA
    - SIT SVA=NO loads CICS TS modules in read-only DSA
  - ❑ CICS program definition controls use of SVA
    - DEFINE PROGRAM... USESVACOPY(NO)

Copyright © 2004 illustro Systems International, LLC

WAVV2004-22

### 31-Bit Exploitation CICS Components

- Most CICS control blocks allocated in 31-bit partition storage
  - ❑ Resource definitions and tables except JCT and sequential terminals in TCT
  - ❑ BMS mapsets
    - Linkedit BMS mapsets RMODE(ANY)
  - ❑ TCA, TWA, EIB, EIS
  - ❑ Transparent to application programs

Copyright © 2004 illustro Systems International, LLC

WAVV2004-23

### 31-Bit Exploitation CICS Components...

- Dynamic backout buffers
  - ❑ Specify size in SIT DBUFSZ
- Trace tables
  - ❑ Allocated in 31-bit partition storage
  - ❑ CICS internal trace table
    - SIT TRTABSZ=16 (256 KB in VSE supplied SIT tables)
  - ❑ CICS transaction trace table
    - SIT TRTRANSZ=16 (512 KB in VSE supplied SIT tables)

Copyright © 2004 illustro Systems International, LLC

WAVV2004-24

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

**31-Bit Exploitation**  
**CICS Components...**

- CICS Data Tables
  - Data in memory for VSAM files
    - High performance file access for files with high READ and BROWSE activity
  - Allocated in 31-bit partition storage in CICS/VSE
  - Allocated in VSE Data Space in CICS TS

### 31-Bit Exploitation CICS Applications...

- Controlling DSA usage with program definition parameters ...
  - Controls DSA used for loading non-reentrant programs
    - EXECKEY(value) and program linked RMODE(24)
      - USER SDSA (24-bit)
      - CICS CDSA (24-bit)
    - EXECKEY(value) and program linked RMODE(ANY)
      - USER ESDSA (31-bit)
      - CICS ECDSA (31-bit)

Copyright © 2004 illustro Systems International, LLC

WAVV2004-31

### 31-Bit Exploitation CICS Applications...

- Controlling DSA usage with program definition parameters ...
  - Controls DSA used for loading reentrant programs
    - Program linked RMODE(24) and SVA-eligible
      - RDSA (24-bit)
    - Program linked RMODE(ANY) and SVA-eligible
      - ERDSA (31-bit)

Copyright © 2004 illustro Systems International, LLC

WAVV2004-32

### 31-Bit Exploitation CICS Applications...

- Controlling DSA usage by applications
  - EXEC CICS GETMAIN options
    - Requested storage acquired in 24-bit DSA
      - LENGTH option
      - FLENGTH BELOW option
      - FLENGTH option in program linked AMODE(24)
    - Requested storage acquired in 31-bit DSA
      - FLENGTH option in program linked AMODE(31)

## Virtual Storage Management and Tuning

WAVV 2004  
Chattanooga, TN

### 31-Bit Exploitation CICS Applications...

- Controlling DSA usage by application request
  - ❑ EXEC CICS GETMAIN options
    - Override TASKDATAKEY
      - ❑ USERDATAKEY without SHARED option
        - UDSA (24-bit) or EUDSA (31-bit)
      - ❑ USERDATAKEY + SHARED option
        - SDSA (24-bit) or ESDSA (31-bit)
    - ❑ CICS DATAKEY
      - CDSA (24-bit) or ECDSA (31-bit)

**Illustro**  
See The Light.<sup>TM</sup>

Copyright © 2004 illustro Systems International, LLC

WAVV2004-34

---

---

---

---

---

---

---

---

### 31-Bit Exploitation CICS Applications...

- Controlling DSA usage with SIT options
  - ❑ TCT User Area (TCTUA)
    - SIT TCTUALOC=BELOW|ANY
      - ❑ BELOW UDSA or CDSA
      - ❑ ANY EUDSA, ECDSA, UDSA or CDSA
        - Programs referencing TCTUA must be AMODE(31)
    - SIT TCTUKEY=USER|CICS
      - ❑ USER SDSA (24-bit) or ESDSA (31-bit)
      - ❑ CICS CDSA (24-bit) or ECDSA (31-bit)

WAVV2004-36

---

---

---

---

---

---

---

---

**Summary**

- More VSCR in CICS TS
- Significant savings after migration without change
- More savings possible with changes
  - AMODE(31) and RMODE(ANY) for applications
  - Application GETMAIN requests
  - CICS TS transaction and program definition changes
